INTRO TO LILY TINY

LINK:
https://www.sparkfun.com/products/10899

Simply sew on 4 LEDs and connect a battery and the LEDs will each blink or fade differently. LilyTiny is a quick and easy way to add twinkling lights to a project without any programming or a bulky Main Board. It’s also a great educational tool for showing a range of functionality without having to get out the computers.

0 - ‘breathing fade’
1 - flash heartbeat pattern
2 - blink on/off
3 - random fade
